

# Estudo do Movimento Retilíneo

## Uniforme

### M.R.U.

A velocidade é **constante**.

**Não há aceleração.**

→  
sentido do mov.

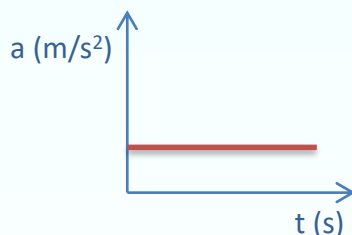

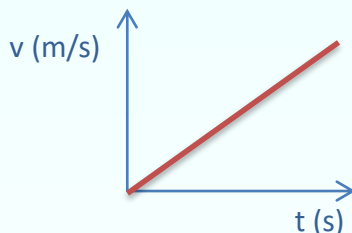

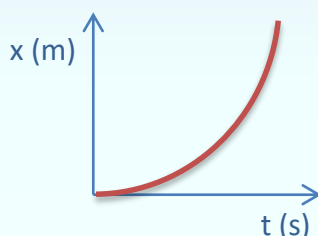

## Uniformemente variado

### Uniformemente acelerado

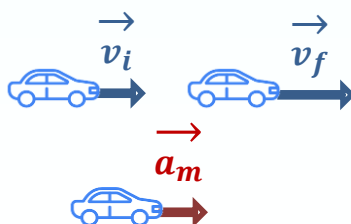

### M.R.U.A.

A velocidade  **aumenta**  progressivamente.

A aceleração é  **constante e positiva** .

→  
sentido do mov.

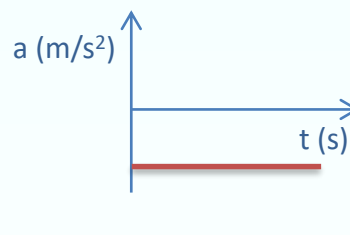

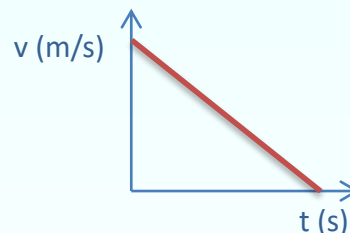

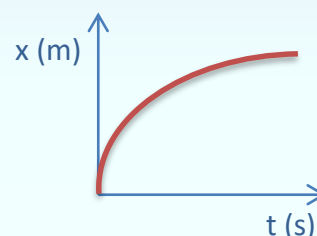

### Uniformemente retardado

### M.R.U.R.

A velocidade  **diminui**  progressivamente.

A aceleração é  **constante e negativa** .

→  
sentido do mov.
